

C# Programming Subject Syllabus

Course Information

Course Title: C# Programming

Course Code: CS 201

Credit Units: 3 Units

Prerequisite: Introduction to Programming

Course Duration: 18 Weeks

Course Description

This course introduces students to software development using C#. Topics include object-oriented programming, data structures, exception handling, file handling, LINQ, database connectivity, and application development.

Learning Outcomes

- Understand C# syntax and programming fundamentals.
- Develop console and desktop applications.
- Apply object-oriented programming principles.
- Handle files, exceptions, and collections.
- Connect applications to databases.
- Build complete C# projects following best practices.

Weekly Course Outline

Week	Topics
Week 1	Introduction to .NET and C#, IDE Setup, First Program
Week 2	Variables, Data Types, Operators
Week 3	Conditional Statements and Loops
Week 4	Methods and Parameter Passing
Week 5	Arrays and Collections
Week 6	Strings and Date/Time Handling
Week 7	Midterm Review and Assessment
Week 8	Introduction to Object-Oriented Programming
Week 9	Classes, Objects, Constructors
Week 10	Inheritance and Polymorphism

Week 11	Encapsulation and Abstraction
Week 12	Exception Handling and Debugging
Week 13	File Input and Output
Week 14	LINQ Fundamentals
Week 15	Database Connectivity with SQL Server
Week 16	Building CRUD Applications
Week 17	Final Project Development
Week 18	Project Presentation and Final Evaluation

Assessment Scheme

Assignments - 20%

Quizzes - 15%

Midterm Examination - 20%

Final Project - 25%

Final Examination - 20%
